

bonding solutions

Polymix Superfast adhesive has an excellent adhesion on almost any kind of material: composite material, glass, wood, steel, aluminium, concrete, plastics. It's doesn't run, resist to a wide range of temperature, doesn't get as brittle as cyanoacrylate, high resistance to vibration and elongation due to temperature changes. Doesn't require a separate activator.

Working time: 30 sec
Curing time: 30 minutes
Available in 50 ml and 178 ml cartridge

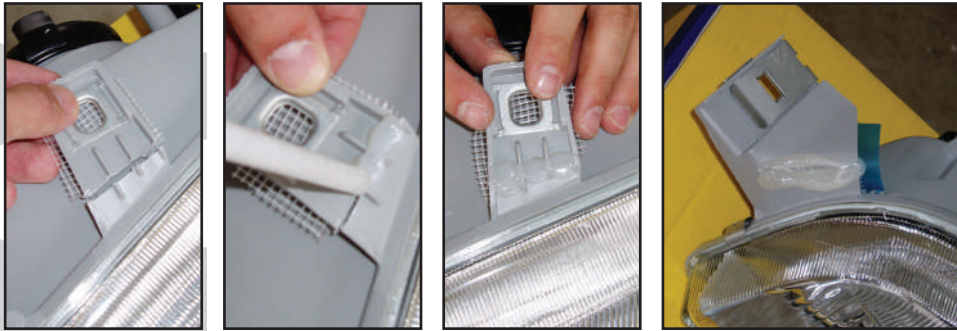

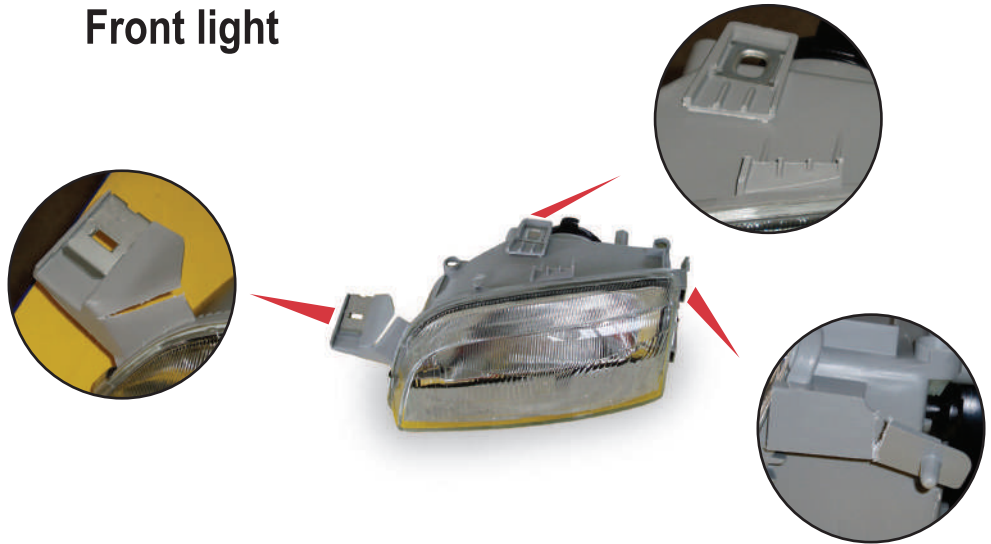

Polymix Super Fast Adhesive

Application guide:

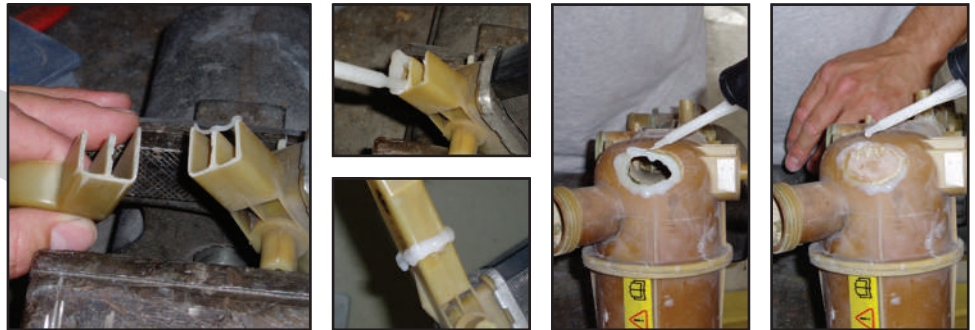

- ▶ Clean both the surfaces to be bonded (when bonding SMC and Fiberglass do not use liquid cleaner)
- ▶ Dry thoroughly with a lint-free cloth
- ▶ Sand the bonding surfaces with 80 grit sanding paper (sanding increase the bonding strength, non-structural parts not necessarily need to be sanded).
- ▶ Apply Superfast adhesive on both parts
- ▶ Join the two parts together and hold strongly for 30 seconds
